

SureTrend®

Data-Driven Excellence In Food Safety

SureTrend® is a comprehensive food safety data analytics software designed to address the challenges faced by food manufacturers. By providing a centralized platform for managing, analyzing and visualizing food safety data, it enables businesses to streamline their operations and maintain regulatory compliance.

The Advantages of SureTrend

Drive Organizational Insight

Visualize complex food safety test data and gain process intelligence

- Save time and focus on critical information
- Visualize testing outcomes for clear communication and action
- Store, track and trend data for program improvements

Assess Risks Easily

View trends and implement early interventions to reduce risks

- Understand risk from historical data to improve food safety programs
- Process analytical data to support quality and safety
- Confidently make data-driven decisions

Be Audit Ready

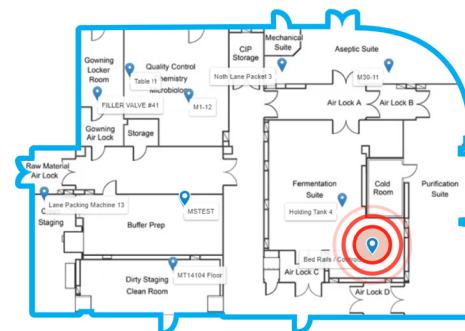

View data that is always current and available

- Quickly access secure data for audits and other compliance needs
- Simplify compliance by leveraging advanced reporting features
- Real-time data synchronization

Take data visualization to the next level with environmental maps.

Visualize test results within your site at a glance

- Upload your floor and map test results by location
- Overlay ATP test results with Indicator organism tests to discover correlations
- Simple drag-and-drop interface
- Use filters to slice and dice your view

SureTrend Subscription Plans:

 What we can offer you:	STARTER	POWER	PREMIUM
	For those getting started with data trending within their facility.	For those who want to track, trend, customize, map and view data on a single facility map.	For those who want to track, trend, customize, map and view data across multiple sites.
